SE League 2017/18 Individual Performance Analysis:

Competitors ideally should run their appropriate age class course or the corresponding Colour Coded course. Colour Coded designations are mapped to age classes as per BOF Guidelines. Running up or down is allowed to suit the competitors capabilities.

The age class in these tables is the runners actual class(es), not the class run. When 'running up' points are related to the distance of class run and the runners actual target speed. When 'running down', reduced points are credited for a successful run as detailed below. Runners who take longer than twice their target time are awarded 1 point, non-finishers and disqualified runners have zero points.

When running the theoretical course for the age, or running up, a factor of 1 is used to calculate the runners points. When running down 1 class/course a factor of 0.75 is used, 0.5 for 2 classes down and 0.25 for 3 classes down. Anyone running down 4 or more classes (successfully) is credited with 1 point.

Total points and runs are for age class and colour coded runners only. Competitors on string courses are not itemised; they each score 1 point which is added to the Club's total at each event, and is not included in the Club's average score per run.

An H signifies a non-competitive score for helpers, controllers etc. Their points are their average from the previous year, or the average of all helpers if no previous statistics for them. These points are not included in the competitors' total points and number of events attended columns.
