Solutions

For each of the 20 problems a solution map is displayed with the following additional symbols:

◦ Answer Flag

○ Other Flags

↑ Viewing point

No.	Ans.	Comment
1	A	The lamppost in the background identifies the two shelters in the picture.
2	B	A single lamppost to the SW confirms that the tree inside the low wall is the one in the control circle.
3	D	The difference in levels of the pathways points to the steps behind the foreground tree. Hence D in the far distance.
4	A	Tricky but B is a slightly smaller flag – hence further away and too close to the end of the hedge.
5	A	Identify the paths crossing and the lamppost next to the curve in the pavement edge.
6		<i>Omitted</i>
7		<i>Omitted</i>
8	B	B is due SW of the corner of the hedge just showing in the photo and close to the kerb. Many boulders are less than 1m high and hence not mapped.
9	A	The large single boulder (over 1m) near the lamppost identifies C. The centre of the circle is further away hence A as the smaller flag.

10	B	Both A and B are at the northern corner but only B is inside the canopy.
11	B	Line up the lamppost, the end of the wall with a sloping top rail to get to A. There is another lamppost behind the circle centre
12	B	The low hill shown by the form line can just be seen. A is too near the lamppost and the bend in the roadway.
13	C	B is higher than C on the top of the low hill shown by the form line. C is thus on the small path. The lamppost confirms.
14	B	The recess in the wall is identified as the correct one by the shelter behind it. A is too near the lamppost, hence B
15	E	Again a lamppost and the drinking fountain (?) identifies E not B of the kites next to the pavement.
16	C	Same photo as 15 but C is correct relative to the canopy. The steps near D are hidden by the hedge.
17	C	Two kites A and C are in a re-entrant near the thicket. But the ground does not rise up past A as the form line shows it should.
18	A	The correct steps are not very visible but B and C are clearly on the two other flights and too far away from the high wall.
19		<i>Omitted</i>
20	B	Allowing for perspective A is on the same contour as lamppost whilst B is correctly further up the slope.
21		<i>Omitted</i>
22		<i>Omitted</i>
23	C	Tricky but the shadows suggest the open ground narrows at C and widens again at B.
24	B	Looking at the edge of the scattered trees gives B.
25	D	Two kites B and D are definitely in clear areas. The N S path just visible in front of it confirms D.
